

Will you know when to leave if a bushfire threatens?

If you live in a bushfire risk area, you need to understand the Fire Danger Rating for your area.

This will help you make decisions about what you will do if a bushfire starts.

FIRE DANGER RATING TODAY

The **Fire Danger Rating** is based on the weather forecast and gives you advice about the level of bushfire threat on a particular day.

Catastrophic: The worst conditions for a fire. Homes are not designed or built to withstand a fire in these conditions. The only safe place is away from the bushfire area.

Extreme Severe or Very High: Seek out information and be ready to leave or stay and actively defend your property if a fire starts. Only stay if you are 100% prepared.

High or Low to Moderate: Be vigilant. Check your fire plan and continue to monitor conditions as they can change quickly.
